

Percentage of high school students who engaged in behaviors that contribute to unintentional injuries, by type of grades earned (mostly A's, B's, C's, or D's/F's) — United States, National Youth Risk Behavior Survey, 2015

Unintentional Injuries	Percentage of students who engaged in each risk behavior, by type of grades mostly earned in school†				Significant Association*
	A's	B's	C's	D's/F's	
Unintentional Injuries					
Never or rarely wore a bicycle helmet (among students who had ridden a bicycle during the 12 months before the survey)	75	81	89	91	Yes
Never or rarely wore a seat belt (when riding in a car driven by someone else)	3	5	8	19	Yes
Rode with a driver who had been drinking alcohol (in a car or other vehicle one or more times during the 30 days before the survey)	15	20	25	32	Yes
Drove when they had been drinking alcohol (one or more times during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey)	4	8	9	19	Yes
Texted or e-mailed while driving a car or other vehicle (on at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey)	43	42	39	44	No

† Percentage of students who engaged in each risk behavior, by type of grades mostly earned in school (mostly A's, B's, C's, D's/F's) are row proportions from cross-tabulations. The percentage of students who did not engage in each risk behavior are not shown. However, the total row proportions for the percentages of students who did and did not engage in each risk behavior, by type of grades mostly earned in school sum to 100%.

*Based on logistic regression analysis controlling for sex, race/ethnicity, and grade in school, p<0.05.
