

Video opens with soft music. Screen shows DHHS and CDC logo with Dr. Wanda Barfield, Director, CDC's Division of Reproductive Health.

Dr. Barfield, "Black women are three times more likely to die from pregnancy-related complications. As healthcare professionals we play a vital role in addressing these differences in outcomes by race. We can give women individualized respectful care. We can work to improve communication and build trust in our patient provider relationships. We can provide timely quality care to every woman.

It begins with really valuing each patient, listening to her, and addressing her concerns.

We can make a difference. Hear her."

Screen fades to show Hear Her logo and text, "Learn more at [cdc.gov/HearHer](https://cdc.gov/HearHer)." Music fades as video ends.
