Source: CDC, National Notifiable Diseases Surveillance System.

\* Rates per 100,000 population.

† For the case definition, see <https://ndc.services.cdc.gov/conditions/hepatitis-a-acute/>.

§ Numbers reported in each category might not add up to the total number of reported cases in a year because of cases with missing data or, in the case of race/ethnicity, cases categorized as “Other.”

¶ Urbanicity was categorized according to the 2013 National Center for Health Statistics (NCHS) urban-rural classification scheme for counties and county-equivalent entities ([https://www.cdc.gov/nchs/data\\_access/urban\\_rural.htm](https://www.cdc.gov/nchs/data_access/urban_rural.htm)). Large central metropolitan, large fringe metropolitan, medium metropolitan, and small metropolitan counties were grouped as urban. Micropolitan and noncore counties were grouped as rural.

# US Department of Health and Human Services (HHS) regions were categorized according to the grouping of states and US territories assigned under each of the 10 HHS regional offices (<https://www.hhs.gov/about/agencies/iea/regional-offices/index.html>). For the purposes of this report, regions with US territories (Regions 2 and 9) contain data from states only.
