

CDC-RFA-PS15-1502 Program Logic Model: Comprehensive High-Impact HIV Prevention Projects for Community-Based Organizations (CBOs)

Strategies and Activities	Short-term Outcomes	Long-term Outcomes
<p>Project Overview</p> <ul style="list-style-type: none"> Provide an overview describing how the proposed program complements the jurisdiction's Comprehensive HIV Prevention Plan and meets the needs of the target population <p>Formalized Collaborations</p> <ul style="list-style-type: none"> Establish service agreements with medical care providers and prevention and essential support services providers to maximize reach, increase coordination and collaboration, and support provision of comprehensive HIV prevention and treatment services and prevention and essential support services providers <p>Program Promotion, Outreach, and Recruitment</p> <ul style="list-style-type: none"> Promote the program to the target population Conduct outreach to recruit the target population into the program <p>Targeted HIV Testing</p> <ul style="list-style-type: none"> Conduct HIV testing among persons at high risk for HIV infection Complementary Services <ul style="list-style-type: none"> Conduct Couples HIV Testing and Counseling (CHTC) Conduct integrated screening for STDs, viral hepatitis, and TB <p>Comprehensive HIV Prevention with HIV-positive Persons</p> <p><u>Linkage to HIV Medical Care</u></p> <ul style="list-style-type: none"> Link newly diagnosed HIV-positive persons to HIV medical care Re-engage previously diagnosed, out-of-care HIV-positive persons in HIV medical care Promote retention of HIV-positive persons in HIV medical care Promote use of antiretroviral therapy (ART) <p><u>Navigation and Prevention and Essential Support Services</u></p> <ul style="list-style-type: none"> Train navigators (e.g., community health workers, peer advocates, outreach workers) to provide referrals to (or provide) prevention and essential support services Refer HIV-positive persons to <i>required and recommended</i> prevention and essential support services (e.g., medication adherence support, Partner Services [PS], High-Impact Prevention [HIP] behavioral intervention, STD screening, housing services) or provide these services <p>Comprehensive HIV Prevention with High-risk HIV-negative (HRN) Persons</p> <p><u>Navigation and Prevention and Essential Support Services</u></p> <ul style="list-style-type: none"> Train navigators (e.g., community health workers, peer advocates, outreach workers) to provide referrals to (or provide) prevention and essential support services Refer HRN persons to required and recommended prevention and essential support service providers (e.g., STD screening, housing services, PrEP and/or nPEP, as appropriate) or provide these services <p>Condom Distribution</p> <ul style="list-style-type: none"> Offer condoms to HIV-positive and HRN persons <p>HIV and Organizational Planning</p> <ul style="list-style-type: none"> Develop or revise an organizational strategic plan that incorporates the proposed program to provide a continuum of HIV prevention and care services Participate in the jurisdiction's HIV planning process 	<p><u>Targeted HIV Testing</u></p> <ul style="list-style-type: none"> <i>Increase in number of target population members tested for HIV</i> <i>Increase in HIV-positive persons who are aware of their infection</i> <p><u>HIV Prevention with HIV-positive Persons</u></p> <ul style="list-style-type: none"> <i>Increase in HIV-positive persons who receive HIV medical care</i> <i>Increase in HIV-positive persons who receive medication adherence services</i> <i>Increase in HIV-positive persons who receive Partner Services</i> <i>Increase in HIV-positive persons who are provided or referred to a HIP behavioral intervention that reduces sexual or drug-related risks related to the transmission of HIV infection</i> <i>Increase in HIV-positive persons who receive required and recommended prevention and essential support services facilitated through trained navigators</i> <p><u>HIV Prevention with High-risk HIV-negative Persons</u></p> <ul style="list-style-type: none"> <i>Increase in HRN persons who are aware of their risk for HIV infection</i> <i>Increase in HRN persons who receive required and recommended prevention and essential support services facilitated through trained navigators</i> <i>Increase in HRN persons who are referred to Pre-Exposure Prophylaxis (PrEP) and/or Non-Occupational Post-Exposure Prophylaxis (nPEP), as appropriate</i> <p><u>HIV Prevention with HIV-positive and HRN Persons</u></p> <ul style="list-style-type: none"> <i>Increase in HIV-positive and HRN persons who are offered condoms</i> 	<ul style="list-style-type: none"> Reduce HIV transmission from PLWH Increase the number of HIV-positive persons with suppressed viral load Reduce HIV incidence among HRN persons Increase the number of partners of HIV-positive persons who are aware of their risk for HIV and are tested for HIV Increase the number of HRN persons who receive and use PrEP and/or nPEP, as appropriate Increase HIV-positive and HRN persons' access to care and improved health outcomes Increase the number of HIV-positive and HRN persons who use condoms consistently and correctly

Impacts: Reduced HIV transmission, Increased access to care and improved health outcomes for people living with HIV/AIDS (PLWHA)

Italicized components of the logic model will be measured in the program.
