

Attachment D – Optional sexually transmitted infection (STI) testing during National HIV Behavioral Surveillance among heterosexuals at increased risk for HIV infection (NHBS-HET): one year

The following is a list of resources that are typically requested to complete the optional STI testing activity during NHBS-HET for one year.

Personnel

- Counseling and testing staff (part-time)
- Data manager (part-time) to perform STI data management duties

Supplies

- Multiplex polymerase chain reaction (PCR)- vaginal swabs
- Supplies for specimen collection

Other

- STI testing incentives (for example, \$10*250 participants)
- Shipping for specimens to local and CDC laboratories
