Data Notes

- HSFS data reflects information that states and territories have reportedly **documented** without estimation. As a result, data reported by CDC EHDI may differ from other sources.
- Some respondents only provided partial data (e.g. hearing screening data only). As a result the number of reporting states and territories and denominators varies for some of the data sections.
- This data is subject to change if additional states and/or territories report data for year 2007.
- **In Process:** Respondents were advised that infants reported as being "In Process" must have been seen for audiologic diagnostic testing *at least one time* to be reported in this category.
- **LFU (Loss to Follow-up) / LTD (Loss to Documentation):** Sub group of "No Documented Diagnosis" and "Total No Services." Includes infants where families were *Unable to be contacted* or *Unresponsive* and *Unknown* cases.
