

## NHSN Long-Term Care Facility (LTCF) LabID Event Reporting Guidance

### Purpose of Document:

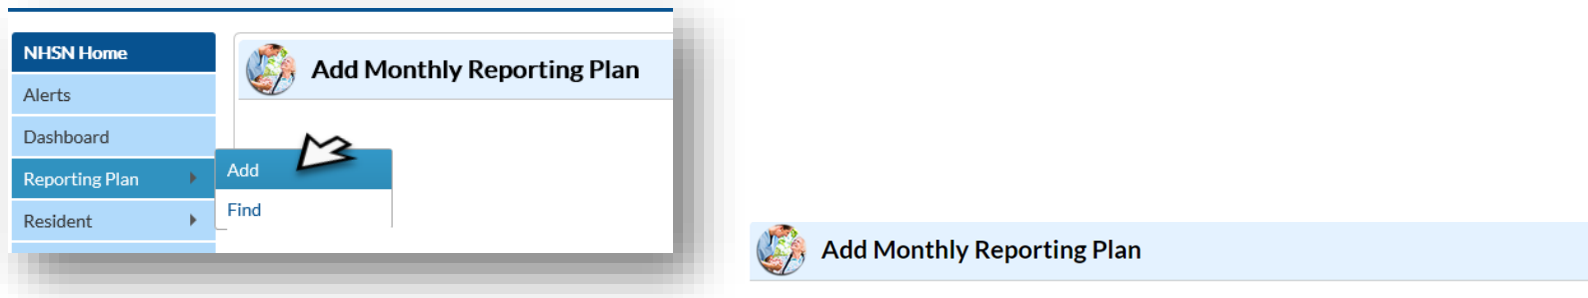

The purpose of this guidance document is to assist long-term care facilities (LTCFs) with reporting laboratory-identified (LabID) events: Multidrug-Resistant Organism (MDRO) and *Clostridioides difficile* Infection (CDI; Cdifficile) in the CDC's National Healthcare Safety Network (NHSN) LTCF Component. LTCFs eligible to report LabID events (MDRO and CDI) data in the long-term care component include skilled nursing facilities/nursing homes, Intermediate Care Facilities for Individuals with Intellectual Disabilities, psychiatric residential treatment facility, and state veterans' homes.

### Important Notes: LabID Events Key Points for reporting MDRO and CDI

- **ALL** MDRO and CDI LabID Events must be submitted to NHSN.
  - Includes:
    - Specimens collected while resident is physically housed in the reporting LTCF.
    - Duplicate CDI events with positive laboratory assays.
    - Residents with prior history of CDI or when the specimen was collected within the first three days of admission to the LTCF.
    - Specimens collected during a brief visit to an outpatient setting, such as an Emergency Department or clinic/physician's office.  
**\*The resident returns to your facility on same calendar day of the OP visit or the following calendar day.**
  - Excludes:
    - Do NOT report results from positive isolates collected as part of active surveillance.
    - Do NOT report a LabID event for a specimen collected prior to the resident's admission to your facility or during admission in another facility.
    - Do NOT report Negative *C. difficile* laboratory assay lab results.
- Submit a Monthly Reporting Plan (MRP) each calendar month in which a facility plans to enter data into the NHSN.
- Surveillance for CDI or MDROs must include all resident care locations in the facility— referred to as facility-wide inpatient or FacWideIN.
  - There is not an option to perform surveillance on select or individual units/pods within the facility.
- Submit [monthly summary data](#) for each participating month, the facility must report the required denominator data.
- Resolve "[Alerts](#)," if applicable.

### Monthly Reporting Requirements for LabID Events in the LTCF Component:

- A NHSN Monthly Reporting Plan must be completed for each calendar month in which a facility plans to enter data into the NHSN.
  - LabID event surveillance must occur for the entire calendar month.

- Select the month and year you plan to conduct surveillance and submit LabID event data to NHSN

Mandatory fields marked with \*

Facility ID \*: Test TM3033 (ID 71093) ▼

Month \*: ▼

Year \*: ▼

No Long Term Care Facility Component Modules Followed this Month

- First, select “Reporting Plan” and then “Add” from the left navigation bar
- Facility-wide Inpatient (FACWIDEIN) is default location
- Select “CDIF-C. difficile” and “MDRO” as the “Specific Organism Type”

LabID Event Module

Locations	Specific Organism Type	Lab ID Event All Specimens
Facility-wide Inpatient (FacWIDEIn) ▼	CDIF - C. difficile ▼	<input checked="" type="checkbox"/>
Facility-wide Inpatient (FacWIDEIn) ▼	MRSA - MRSA ▼	<input checked="" type="checkbox"/>

Click to add additional organisms

- ACINE - MDR-Acinetobacter
- CDIF - C. difficile
- CEPHRKLEB - CephR-Klebsiella
- CRE - CRE (CRE-Ecoli, CRE-Enterobacter, CRE-Klebsiella)
- MRSA/MSSA - MRSA with MSSA
- MRSA - MRSA
- VRE - VRE

- “LabID Event All Specimens” is default

### Common Terms and Definitions used in CDI LabID Events:

- **C. difficile positive laboratory assay:** (1) An unformed/loose stool that tests positive for *C. difficile* toxin A and/or B, (includes molecular assays [PCR] and/or toxin assays); OR (2) A toxin-producing *C. difficile* organism detected in an unformed/loose stool by culture or other laboratory means.
- **CDI Laboratory-identified (LabID) Event:** *C. Difficile* positive laboratory assay collected while resident is under the care of the reporting LTCF. Includes residents physically housed and cared for in the reporting LTCF and residents being cared for during a brief outpatient visit in which the resident returns to the reporting LTCF on the day of the OP visit or the following calendar day.
- **Facility-wide Inpatient (FacWideIN):** All resident care locations in the facility.
- **LabID Event Date:** Specimen collection date.

### Categorization of CDI LabID Events:

- NHSN will analyze data that have been entered into the application based on the specimen collection date of the most event CDI LabID event.
  - **Duplicate CDI LabID event:** Duplicate CDI LabID event: Any CDI LabID event submitted for the same resident following a previous CDI LabID event within the past **2 weeks**.
  - **\*Incident CDI LabID event:** Either the first CDI LabID event ever submitted for an individual resident in the facility, or a subsequent CDI LabID event submitted more **than 56 days (8 weeks)** after the most recent CDI LabID event reported for the individual resident.
  - **\*Recurrent CDI LabID event:** Any CDI LabID Event entered more than 14 days (2 weeks) and less than 57 days (**8 weeks**) after the most recent CDI LabID event submitted to NHSN for an individual resident.

**Example: Fictitious resident with multiple CDI LabID events entered in NHSN that simplifies NHSN Categorization explanation.**

Example: NHSN Classification of CDI Lab ID Events as Incident or Recurrent			
Resident ID	Current Admit Date	CDI Event Date (specimen collection date)	NHSN Categorization
1111	09/01/2022	09/02/2022	Incident
1111	09/01/2022	09/10/2022	Duplicate -no further categorization
1111	09/01/2022	09/25/2022	Recurrent
1111	09/01/2022	11/28/2022	Incident

**Incident**-The first CDI LabID event ever submitted by the reporting LTCF  
**Duplicate**- CDI LabID event reported within 2 weeks (<15 days)  
**Recurrent**->14 days and less than 57 days (8 weeks)  
**Incident**-LabID event > 56 days after the most recent CDI LabID event

**\*Incident and Recurrent CDI LabID events are further categorized based on:**

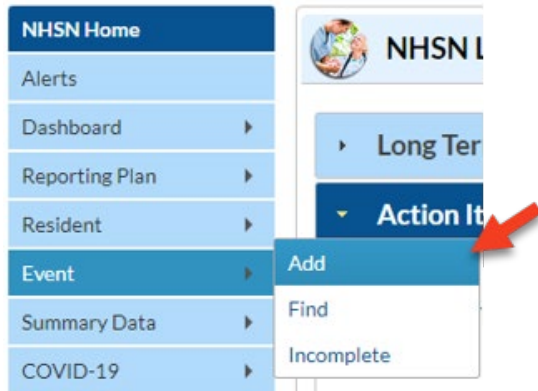

1. Reported date of current admission to facility
2. Reported specimen collection date (also referred to as date of event)
3. Reported date of last transfer from acute care to the reporting LTCF
  - Community-onset (CO) LabID events: Date specimen collected 3 calendar days or less after current admission to the facility (i.e., days 1, 2, or 3 of admission).
  - Long-term Care Facility-onset (LO) LabID event: Date specimen collected greater than 3 calendar days after current admission date (i.e., on or after day 4).
  - LO Events are further sub-classified:
    - **Acute Care Transfer-Long-term Care Facility-onset (ACT-LO):** LTCF-onset (LO) LabID event with a specimen collection date of **4 weeks or less** following date of last transfer from an acute care facility to the LTCF.

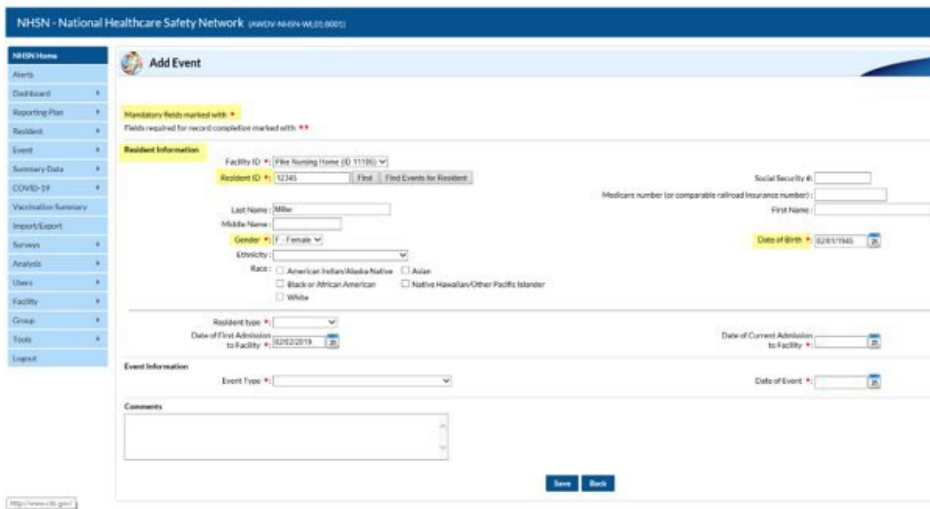

October 2023

## How to Submit a LabID Event:

**Step 1:** To enter a CDI or other LabID event, from the home screen, users must click “Event” and then “Add.”

**Step 2:** The “ADD Event” page will pre-populate with the Facility ID. The user will need to enter the required resident information, identified by the red asterisks.

October 2023

**Step 3:** The “Resident Type” is auto-populated by NHSN as short stay or long-stay after the user enters the “Date of First Admission to the Facility” and the “Date Specimen Collected” (specifically for LabID events).

**SS-Short-stay:** On the date of specimen collection (event date), the resident has been in facility for 100 days or less from date of first admission.

**LS-Long-stay:** On the date of specimen collection (event date), the resident has been in facility for more than 100 days from date of first admission

**Step 4:** Enter the “Date of First Admission to Facility” and the “Date of Current Admission to Facility”:

**Date of First Admission to Facility:**

If the resident leaves the facility and is away for 30 or more consecutive days, the date of first admission should be updated to the date of return to the facility. Select the Date of First Admission using the drop-down calendar.

**Date of Current Admission to Facility: (Note)** Date of current admission must occur BEFORE the date of event.

**Date resident first entered the facility.** This date remains the same even if the resident leaves the facility (transfers to another facility) for short periods of time (<30 consecutive days).

**Most recent date resident entered the facility.** If the resident enters the facility for the first time and has not left for more than 2 calendar days, then the date of current admission will be the same as the date of first admission. If the resident leaves the facility for more than 2 calendar days (the day the resident left the facility = day 1) and returns, the date of current admission should be updated to the date of return to the facility.

**Step 5:** Scroll down to the “Event Information” section. For “Event Type”-select LabID event.

- The Date of event will be the Date the Specimen was collected.

The screenshot shows the 'Event Information' section of a form. At the top, there are two date pickers: 'Date of First Admission to Facility' with the value '09/02/2021' and 'Date of Current Admission to Facility' with the value '09/02/2021'. Below these is the 'Event Type' dropdown menu, which is set to 'LABID - Laboratory-identified MDRO or CDI Event'. To the right of the dropdown is the 'Date Specimen Collected' field, which is currently empty. A yellow callout box with arrows pointing to the 'Date Specimen Collected' field contains the text: 'Date Specimen Collected cannot occur before Date of Current Admission to Facility'. A blue callout box with an arrow pointing to the 'Date Specimen Collected' field contains the text: 'Also referred to as Date of Event'.

**Step 6:** Select the “Specific Organism Type” that you are submitting event data for. After selecting the specific organism type, the remainder of the page will populate with the relevant questions.

**Event Information**

The screenshot shows the 'Event Information' section. The 'Event Type' dropdown is set to 'LABID - Laboratory-identified MDRO or CDI Event'. Below it, the 'Specific Organism Type' dropdown menu is open, displaying a list of options: ACINE - MDR-Acinetobacter, CDIF - C. difficile, CEPHRKLEB - CephR-Klebsiella, CREECOLI - CRE-Ecoli, CREENTERO - CRE-Enterobacter, CREKLEB - CRE-Klebsiella, MRSA - MRSA, MSSA - MSSA, and VRE - VRE. The 'CDIF - C. difficile' option is highlighted in yellow.

**Step 7:** Since LabID Event was selected as the Event Type, the next box requires the user to enter the Specific Organism Type. This box will populate with all of the organism options available in the LabID Event module. Since a CDI LabID Event is being reported, the user must select CDIFF-C. difficile as the specific organism type. After selecting C. difficile, the next two boxes will **pre-populate with the specimen body site/system-as**

October 2023

**digest-digestion system, and specimen source as Stool-stool specimen.** There are **no** other specimen source options when reporting *C. difficile* events into NHSN.

**Event Information**

Event Type \*: LABID - Laboratory-identified MDRO or CDI Event

Specific Organism Type \*: CDIF - C. difficile

Select CDIF-C. difficile to auto-populate specimen body site and specimen

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: STOOL - Stool specimen

**Step 8:** The next box requires the user to enter the location of the resident at the time of specimen collection. The populated resident care locations are the locations the facility adding during NHSN set-up and should reflect all of the resident care locations in facility. By entering the resident care location, the facility is able to monitor *C. difficile* trends in particular locations within the LTCF if they choose to do so.

**Event Information**

Event Type \*: LABID

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: STOOL - Stool specimen

Resident Care Location \*: 4 GEN - GENERAL UNIT

Select location of resident at time of specimen collection. Note: Resident care locations are set-up by the facility after facility enrollment

**Note:** Resident care locations must be set-up (mapped) in the NHSN application before reporting events since the event location will be selected during event reporting.

October 2023

**Step 9:** Next, the user is required to select from a drop-down menu the single primary service that best represents the type of care the resident was receiving on the date the specimen was collected. The available service types are auto populated with NHSN service types, which means they are not pre-set-up by the facility. The drop-down options for “Resident Care Locations” and “Primary Resident Service Type” options will be the same regardless of the event being entered into the NHSN.

**Event Information**

Event Type \*: LABID - Laboratory-identified MDRO or CDI Event

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: BARIA - Bariatric

Resident Care Location \*: HOSP - Hospice/Palliative

Primary Resident Service Type \*: **GENNUR - Long-term general nursing**

PSYCH - Long-term psychiatric

SKNUR - Skilled nursing/short term rehab

VENT - Ventilator

Select the NHSN Primary Resident Service Type at time of specimen collection

**Step 10:** For the next question, enter “Yes” if the resident has been an inpatient of an acute care facility (Hospital, Long-term acute care hospital, or acute inpatient rehabilitation facility only) and was directly admitted to your facility in the past four weeks, otherwise select “No”.

If YES is selected, two additional required questions will populate for the user to answer:

- The date of last transfer from acute care to your facility.
- Was the resident on antibiotic therapy for this specific organism type at the time of transfer to your facility?

**Event Information**

Specimen

Resident

Primary Resident Service Type: GENNUR - Long-term general nursing

Was the resident **directly** admitted to your facility from an acute care facility in past 4 weeks? If ‘YES’ is selected, additional data must be entered

Has resident been transferred from an acute care facility in the past 4 weeks \*?: Y - Yes

**Note:** Resident visits to the ED/ER or outpatient visits (physician’s office) are excluded since these outpatient visits do not represent an actual inpatient admission into an acute care facility.

October 2023

**Event Information**

Event Type \*: LABID - Laboratory-identified MDRO

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: STOOL - Stool specimen

Resident Care Location \*: 4 GEN - GENERAL UNIT

Primary Resident Service Type \*: GENNUR - Long-term general nursing

Has resident been transferred from an acute care facility in the past 4 weeks \*: Y - Yes

This answer to this question will be used by NHSN to determine if the LabID event is associated with an acute care transfer

If Yes, date of last transfer from acute care to your facility \*:

This question will be used by NHSN application to determine if the CDI LabID event should be categorized as Acute Care Transfer-Long-term Care Facility-onset (ACT-LO) if it is a long-term care facility onset event.

**Step 11:** You will then need to answer if the resident was on any antibiotic therapy for this specific organism at the time of transfer. If yes, the resident should be included in the admission count for treatment on the monthly summary. As a surveillance measure, this will inform facilities of any CDI burden coming in their facility.

**Event Information**

Event Type \*: LABID - Laboratory-identified MDRO or CDI Event

Date Specimen Collected \*: 01/07/2021

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: STOOL - Stool specimen

Resident Care Location \*: 100 EAST - DEMENTIA UNIT

Primary Resident Service Type \*: GENNUR - Long-term general nursing

Has resident been transferred from an acute care facility in the past 4 weeks \*: Y - Yes

If Yes, date of last transfer from acute care to your facility \*: 01/05/2021

If Yes, was the resident on antibiotic therapy for this specific organism type at the time of transfer to your facility \*:

Informs burden of CDI coming into facility

If YES to this question, this resident should also be included in the monthly summary count for *Number of Admissions on C. diff Treatment*

October 2023

**Step 12:** The final question, “Documented evidence of previous infection or colonization with this specific organism type from a previously reported LabID Event in any prior month?” is a system **auto-populated field** and is based on prior months LabID Events. “Yes” or “No” will be auto filled by the system only, depending on whether there is prior LabID Event entered for the same organism and same patient in the prior months. This response **cannot be edited by the user**.

Event Information

Event Type \*: LABID - Laboratory-identified MDRO or CDI Event

Date Specimen Collected \*: 01/07/2021 25

Specific Organism Type \*: CDIF - C. difficile

Specimen Body Site/System \*: DIGEST - Digestive System

Specimen Source \*: STOOL - Stool specimen

Resident Care Location \*: 100 EAST - DEMENTIA UNIT

Primary Resident Service Type \*: GENNUR - Long-term general nursing

Has resident been transferred from an acute care facility in the past 4 weeks \*: Y - Yes

If Yes, date of last transfer from acute care to your facility \*: 01/05/2021 25

If Yes, was the resident on antibiotic therapy for this specific organism type at the time of transfer to your facility \*: Y - Yes

Documented evidence of previous infection or colonization with this specific organism type from a previously reported LabID Event in any prior month? Y- Yes

Auto-populated by the NHSN.  
Non-editable by users

**Step 13:** The last two fields are optional and may be used for local or group use to customize or expand data collected by the LTCF. In the custom field, up to 50 fields may be customized with date, numeric, or alphanumeric information. The comments section is a place for the user to add additional information about a particular event. Unlike the custom fields, which must be set up prior to use, comments can be added at the time the event data is being entered and is free text. **Keep in mind that NHSN does not use the data entered in custom fields or comments for any analysis functions.**

October 2023

**Step 14:** Once “Save” is selected, the event will be assigned an event number, and the user will receive a message at the top of the screen indicating the event has been created.

**Notes**

- If a specimen is collected while the resident is receiving care in an ED or OP setting, the Resident Care Location and Primary Resident Service Type should indicate the resident's primary LTCF location and service type prior to the ED or OP visit.
- Surveillance for CDI or MDROs must include all resident care locations in the facility— referred to as facility-wide inpatient or FacWideIN.
- When submitting a LabID event for a specimen collected in an OP setting, the Resident Care Location and Primary Resident Service Type should reflect the resident's primary LTCF location and service type on the day of the outpatient visit.
- Do NOT report a LabID event for a specimen collected prior to the resident's admission to your facility.
- Do NOT report results from positive isolates collected as part of active surveillance.
- There is not an option to perform surveillance on select or individual units/pods within the facility.
- Do NOT report Negative C. difficile laboratory assay lab results.
- Submit [summary data](#) for each participating month, the facility must report the required denominator data.
- Resolve "[Alerts](#)", if applicable.

October 2023

## Monthly Summary Data

The monthly summary data elements for participation includes:

- Resident Admissions
- Resident Days
- Report No Events, if applicable

## Alerts

Users have several options for identifying and resolving the alerts. For example, on the home page, a user may click on the individual alert box or click ALERTS from the left blue navigation bar.

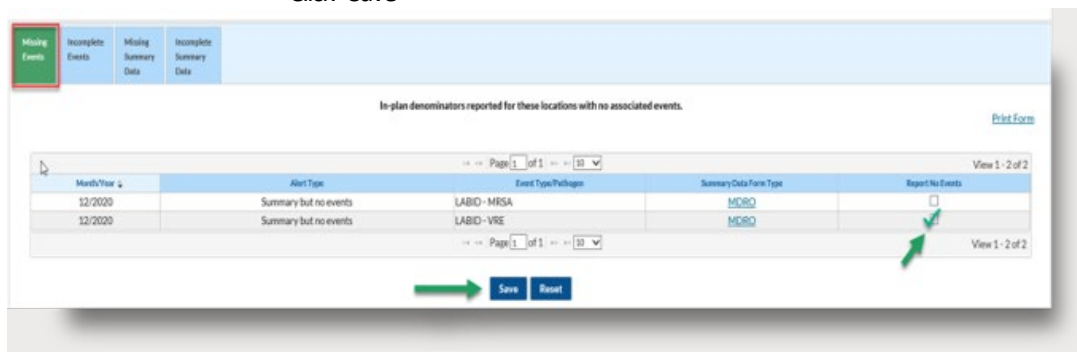

### Missing Events:

The LabID event module is selected in the Monthly Reporting Plan, but no MDRO or CDI events were submitted for the month, and the “Report No Events” box was not selected on the Monthly Summary page for that calendar month.

#### **To resolve the alert:**

- Submit CDI and/or selected MDRO event(s) for calendar month.
- If no events to report for the month, click box to indicate “**Report No Events**” by each event type/pathogen.
- Click “Save”

October 2023

**Missing Summary Data:**

The summary data was not completed for the month.

**To resolve the alert:**

- Click the "Add Summary" hyperlink.
- Enter Summary Data under "MDRO & CDI LabID Event Reporting."
- Remember to click "SAVE" before exiting.

**Incomplete/Missing List**

Missing Events | Incomplete Events | **Missing Summary Data** | Incomplete Summary Data
