

## Instructions for Completion of the Person-Level COVID-19 Vaccination Form for Healthcare Personnel of Long-Term Care Facilities

The optional Person-Level Vaccination Form for Healthcare Personnel (HCP) was developed to assist facilities with managing and tracking person-level vaccination data directly in NHSN. This allows the application to automatically calculate and submit the weekly summary totals to the main NHSN Weekly HCP COVID-19 Vaccination Modules. Users update the person-level data with any changes to an individual's vaccination status over time, click **'View Reporting Summary and Submit'** to review the totals, and submit their weekly data to the Weekly HCP COVID-19 Vaccination Module. We recommend that all long-term care facilities (LTCFs) use the Person-Level COVID-19 Vaccination Form to ensure accurate reporting of summary data when submitting data to the Weekly COVID-19 Vaccination Modules. Learn more here: LTCF Person-Level Vaccination Form How to Guide June 2024 508 (cdc.gov)

Please note if you plan to submit person-level data via .CSV file upload, please refer to the latest variable description and file layout for person-level vaccination forms document for additional guidance on formatting Variable description and file layout for residents and healthcare personnel of LTCFs (12.2) [PDF – 299 KB] – June 2024

Data Fields	Instructions for Completion
Unique HCP Identifier	<ul> <li><i>Required.</i> Enter a unique identifier for the healthcare worker, assigned by your facility. This can be any combination of letters and numbers. This identifier is designated by your facility, not NHSN. You can directly enter the identifier, or you can click the <b>Find</b> button and select a healthcare worker from the list of healthcare workers who have previously had data submitted in NHSN via other Person-Level Forms (e.g., Point of Care Testing (POC) Tool).</li> <li>Ensure that you are using the same identifier used for entering the</li> </ul>
	<ul> <li>individual into other Person-level modules or pathways within the LTCF Component, as applicable.</li> <li>Avoid: <ul> <li>Using Date of Birth or room number as an identifier, as these can be shared by more than one individual and may result in duplicate IDs.</li> <li>Starting the identifier with a 0 (zero). If you import data from a CSV file, the CSV drops the leading 0, and this changes the ID.</li> </ul> </li> </ul>

	of COVID-19 vaccine.
	Enter the date the healthcare worker received dose 3 of COVID-19
	vaccine.
Dose 3 dose type	Conditionally required if Dose 3 vaccination date is entered AND the
	date entered is before 6/26/2023. If the date entered is on or after
	6/26/2023, this data field is no longer required.
	Select the type of dose the healthcare worker received from the
	drop-down box:
	- Additional Dose
	- Booster Dose
	A <b>booster dose</b> is another dose of vaccine administered to enhance
	or restore protection which might have waned over time after
	primary series vaccination.
	An additional dose is another dose of vaccine administered to
	people who were less likely to mount a protective immune response
	after initial vaccination. Individuals who are moderately or severely
	immunocompromised should receive an additional dose.
	Note: For NHSN surveillance purposes, assume all doses received
	after a COVID-19 primary vaccination series are booster doses
	unless there is specific documentation indicating an additional dose
	was administered due to the individual having a moderately to
	severely immunocompromising condition.
