# Analysis Reports Treeview Update

As of October 2023, NHSN facility and group users will see a new folder structure in the Analysis and Reports section of the NHSN application. The primary purposes of this update are to improve usability, reorganize the reports, and facilitate the addition of new reports in the future. This new treeview structure will also better accommodate the upcoming NHSN rebaseline. While some reports or even entire folders have been relocated, the overall functionality of the treeview remains unchanged; any analysis that could be done before the treeview update is still possible post-update. This quick reference guide can be used as a tool to help locate specific reports within the updated treeview menu.

For a more detailed demonstration of the changes to the treeview structure, refer to the treeview update E-book.

Navigating this Document

This document contains the entire treeview structure and lists every report. The table of contents below links to each of the 9 first-level folders where users can browse the various reports. This quick reference guide uses the following 4-level notation for the treeview structure:

<p style="text-align:center"><u>First level folder</u></p>
