

NHSN: OUTPATIENT PROCEDURE COMPONENT SURGICAL SITE INFECTION WB4633

PROGRAM DESCRIPTION: The goal of this web-on-demand activity is to educate Ambulatory Surgery Center (ASC) healthcare providers on the Outpatient Procedure Component Surgical Site Infection (OPC-SSI) protocol and application of the OPC-SSI protocol in order to improve patient outcomes related to operative procedures performed in an ASC environment.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

1. Describe four reporting requirements for the OPC-SSI protocol
2. Describe the three SSI tissue levels included in both general and Breast Surgery OPC-SSI criterion
3. Name the four procedural steps in reporting an OPC-SSI event
4. Name the four procedural steps in reporting denominators for procedures
5. Describe two data analysis options for OPC-SSI
6. Describe the three components of the OPC-SSI discharge toolkit
7. Describe my role, responsibilities, and scope of practice as a team member
