To Whom it May Concern:

Thank you for proposing the new standards for Respiratory Protective Devices as published in the May 24th Federal Register. It is encouraging that this improvement in the certification process is finally addressing my needs at our health care setting. The 95% filter efficiency will be a much more acceptable particulate respirator for the care and management of Tuberculosis patients. The cost will be much more manageable for our already economically challenged health care facilities.

Sincerely,

A handwritten signature in cursive script that reads 'Michelle Farber'.

Michelle Farber, RN, CIC
Infection Control Practitioner
