Gentlemen:

We ask that you consider the recall of 42 C.F.R. Part 84 as proposed on August 27, 1987.

Over the past years we have developed a very good respirator program, and get very good results in the employee use of the present filter design.

A filter designed to meet your new regulations would be very onerous to wear - bulky, hot, heavy, and hard to breath through, and generally so uncomfortable that employees would most likely rebel.

Lets not create more problems for ourselves, and for our employees.

Very truly yours,

E. R. Bowery
Plant Engineer
