USA

Comments
The slides in the presentation have quite a bit of good information, but the presentation as a whole is difficult to follow. We had a lot of feedback from our students who watched this as part of the pilot project this year, and they thought that the presentation needed improvement. The main comments were that the presentation is too long, and the audio and slides did not "match," making it difficult to follow. They did think that the video in the middle of the presentation was helpful.
