Letter to All Manufacturers

Subject: NIOSH/NPPTL CBRN Respirator Research and Development (R&D) Test Program

The December 28, 2001 Letter to Manufacturers announcing the Chemical, Biological, Radiological and/or Nuclear (CBRN) SCBA standard identifies a flexible certification test program that provides chemical agent test capability. In a July 12, 2002 Letter to Manufacturers, the flexible CBRN SCBA Program was extended to January 22, 2003. The purpose of this letter is to introduce a new CBRN Respirator Research and Development Test Program. The new program provides the same access to chemical agent testing as the flexible CBRN SCBA Program and increases the ability for manufacturers to perform trial and error type research and development testing to prove the effectiveness of respirator materials, surfaces and designs before submitting the product for NIOSH CBRN certification testing. The CBRN Respirator R&D Test Program is limited to applicants with a quality control plan evaluated as acceptable by NIOSH.

The new CBRN Respirator Research and Development Test Program's effective date is immediate. The new program is applicable for both CBRN SCBA (open circuit) testing and CBRN APR (tight fitting, full face) testing. The new program will include up to three consecutive test days, in the chemical test laboratory at Soldier Biological Chemical Command (SBCCOM), Edgewood Area, (Bldg. E5100). For the three test days it is expected that a maximum of 4 Smartman Tests (2 for GB and 2 for HD) plus 10 material swatch tests per agent can be performed. Fewer tests are possible as determined by the applicant. Efforts will be made to process CBRN Respirator Research and Development Tests as quickly as possible, however, CBRN certification testing will be processed with a priority. NIOSH will process a letter of application and upon completion of initial review, NIOSH will authorize SBCCOM to schedule the R&D tests and confirm the schedule with NIOSH and the applicant. The applicant may have a maximum of three representatives present during the testing due to space limitations. Contractor representatives must be United States citizens, or, if foreign nationals, have obtained approved visit requests through their embassies and under the procedures of Department of Defense to visit SBCCOM to view the testing.

To participate in the NIOSH CBRN Respirator Research and Development Test program the applicant is required to submit a letter application to NIOSH. The letter application must contain a brief description of the respirator to be tested and the tests desired to be performed. [Attachment A, Sample Letter](#), illustrates the required content. The tests to be performed are to be selected from the [Attachment B test schedule](#).

Each application must include a check for an amount to cover the selected tests. Processing of letter applications will be according to the date and time received.

Multiple CBRN Respirator Research and Development Test Applications are possible but only one active application per applicant per respirator class is permitted at one time. Data obtained from tests is retained by the applicant and may be used as supporting data (pre-submission) in a certification application for CBRN SCBA or APR approval. Test results from the CBRN Respirator Research and Development Test Program are not applicable as certification tests.

Sincerely yours,

Roland J. Berry Ann

Attachment A:

**Sample NPPTL CBRN Respirator
Research and Development Test Letter Application**

Date: January XX, 2003

Subject: Letter of Application Request for CBRN Respirator Research and Development (R&D) Tests

Applicant Name & Address:

CBRN Test Respirator Description:

A. Model XYZ Respirator consisting of the listed major components is submitted for CBRN Respirator Research and Development Tests:

- XXXXX Facepiece
- YYYYY First Stage Regulator
- ZZZZZ Second Stage Regulator
- LLLLL Harness Assembly
- KKKKK Valve Assembly

B. 4- Elastomer Samples for Swatch Testing

- PPPPP Type of Surface against GB
- RRRRR Type of Surface against HD

C. Total Number of Respirators and Material Samples Provided for R&D Testing:

(Note 1: Each live agent SMARTMAN test requires one complete respirator.)
 (Note 2: Respirators and materials exposed to chemical agents will not be returned.
 SBCCOM will retain chain of custody for tested items and process equipment for destruction as hazardous waste.)

CBRN Test Plan:

- A. Perform 2 SMARTMAN GB Tests at \$4500 per test = \$ 9,000
- B. Perform 2 SMARTMAN HD Tests at \$4500 per test = \$ 9,000
- C. Perform 2 Fruit Fly Swatch Tests at \$50 per test = \$ 100
- D. Perform 2 Indicator Paper Swatch Tests at \$50 per test = \$ 100

Example Total = \$18,200.00 plus shipping costs.

Test Materials:

Test respirators and material swatches have been shipped to:

Commander, SBCCOM
 Bldg. E5100
 ATTN: Ray Lins/Lee Campbell
 US Army

Soldier and Biological Chemical Command
Edgewood Area
Aberdeen Proving Ground, MD 21010-5423
(410) 436 - 2772

Fees: A check for XXXX for the requested tests is enclosed.

Test Results Shipping Address: Manufacturer provides a ship to address with a name contact for NIOSH / SBCCOM R&D test data to be shipped to at the end of the testing. Test results do not qualify as NIOSH CBRN certification approval credit. Favorable results do not indicate an endorsement by either SBCCOM nor NIOSH.

Attachment B

**CBRN Respirator Research and Development (R&D)
Test Schedule and Fees**

NIOSH Smartman Test	GB Test	\$4500
NIOSH Smartman Test	HD Test	\$4500

Material Swatch Test, Fruit Fly, SBCCOM STP: \$50 per swatch /10 swatch/agent

Material Swatch Test, Indicator Paper SBCCOM STP: \$50 per swatch /10 swatch/agent

Note: One 5" by 5" material sample is required per swatch test.
