I have reviewed the portion of the legislation that Beth pointed out to us at the meeting (1-B-vi) this morning. I do not believe that the section about firefighters is directing us to do an epidemiologic study. My interpretation of this is that they are instructing us to study incidents, issues, policies and practices related to firefighters. This section will probably require us to prepare a separate chapter on firefighters or perhaps even a separate report but I don't think we need to conduct epidemiologic research. Ted, do you agree? Jack, Pat and Beth please reread (a 2-minute task) and let me know what you think. Thanks.

Steven
