**Comments**  
As a pediatric nurse practitioner practicing in rural Iowa, I have seen and cared for children injured as the result of actions taken by parents and children that were NOT SAFE. I also know that these can be prevented by educating the parents, older children and teens to use safer practices.  
The Childhood  
Agricultural Injury Prevention Initiative has provided funding and great work in this area. Please continue this program that was started in 1996---it is still needed. New children and new parents are developed ALL THE TIME!!! Jan
