USA

Comments

It is unnecessary for the standard to mandate that the Air Pack Manufacturer dictate the rising cost of inflation for the SCBA bottle.

There are approved bottle manufacturers that are producing NIOSH approved materials that will help reduce the expense to the fire service. The continued inflating of cylinder cost by pack manufactureres has reduced the availability of departments to be able to order more quantity to better enhance the life and safety of the suppression personnel, responders, etc that have a need for SCBA.

Please support the allowance and recognition of direct sales without a "brand" LOGO.

Chief Johnson
