

website—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment from the FTC website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 13, 2018. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see <https://www.ftc.gov/site-information/privacy-policy>. For supporting documentation and other information underlying the PRA discussion in this Notice, see <http://www.reginfo.gov/public/jsp/PRA/pradashboard.jsp>.

Comments on the information collection requirements subject to review under the PRA should additionally be submitted to OMB. If sent by U.S. mail, they should be addressed to Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Federal Trade Commission, New Executive Office Building, Docket Library, Room 10102, 725 17th Street NW, Washington, DC 20503. Comments sent to OMB by U.S. postal mail, however, are subject to delays due to heightened security precautions. Thus, comments instead can also be sent by email to wliberante@omb.eop.gov.

Heather Hipsley,
Deputy General Counsel.

[Docket No. CDC-2018-0110; NIOSH-224]

Barriers to Participation in the NIOSH Coal Workers Health Surveillance Program

AGENCY: Centers for Disease Control and Prevention, HHS.

ACTION: Request for information.

SUMMARY: The Coal Workers' Health Surveillance Program (CWHSP or Program), administered by CDC's National Institute for Occupational

Safety and Health (NIOSH), is seeking information from coal miners, miner advocates, unions, industry stakeholders, and other interested parties about barriers to participating in health screening offered by the Program to inform efforts to improve participation.

DATES: Comments must be received by January 14, 2019.

ADDRESSES: *Written comments:* Comments may be submitted electronically, through the Federal eRulemaking Portal: <http://www.regulations.gov>, or by sending a hard copy to the NIOSH Docket Office, Robert A. Taft Laboratories, MS-C34, 1090 Tusculum Avenue, Cincinnati, OH 45226. All written submissions received must include the agency name (Centers for Disease Control and Prevention, HHS) and docket number (CDC-2018-0110; NIOSH-224) for this action. All relevant comments, including any personal information provided, will be posted without change to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Cara N. Halldin, NIOSH Coal Workers' Health Surveillance Program, Respiratory Health Division, 1095 Willowdale Road, MS HG900.2, Morgantown, WV 26505-2888; (304) 285-5754 (this is not a toll-free number); challdin@cdc.gov.

SUPPLEMENTARY INFORMATION:

The NIOSH Coal Workers' Health Surveillance Program was authorized by the Coal Mine Health and Safety Act of 1969, as amended by the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801 *et seq.*), to detect dust-induced interstitial lung disease (black lung or coal workers' pneumoconiosis) and prevent its progression in individual miners, and obtain information about temporal and geographic trends across the population of coal miners. Through the Program, coal miners are offered periodic health screenings, including chest x-rays and spirometry examinations, at no cost to them. These screenings can potentially detect early signs of black lung. NIOSH has administered the Program since 1970. Since that time, the prevalence of radiographic evidence of pneumoconiosis among participating coal miners reached its lowest level in the late 1990s, but has steadily increased since 2000 and is now at a 25-year high. In the Appalachian coal mining states of Kentucky, Virginia, and West Virginia, as many as one in five underground coal miners with more than 25 years' tenure are thought to have radiographic evidence of

pneumoconiosis.¹ Participation by coal miners in the CWHSP is voluntary, and about 35 percent of active coal miners participate in health screenings offered by the Program.²

Greater participation in the Program would provide more opportunities for early detection of pneumoconiosis in coal miners, providing those with early disease the ability to take action to reduce the chance for progression to severe lung disease. In order to identify ways to improve participation in the Program, NIOSH is seeking information from all interested parties, especially active coal miners, as well as miner advocates, unions, industry stakeholders, and healthcare providers of screening services for the CWHSP, to learn about the factors that keep miners from participating in the health screening examinations that are available to them.

NIOSH is particularly interested in receiving information about the following questions:

1. Are coal miners aware that periodic health screenings are available, at no cost to them, through the Coal Workers' Health Surveillance Program?

2. Is lack of convenience of the screening—for example, screening locations or hours of availability—a barrier to participation? If yes, please describe those factors that may prevent miners from accessing CWHSP screenings.

3. NIOSH's mobile surveillance unit travels to different locations to provide free black lung screenings, including chest x-rays and spirometry tests.³ Does the mobile unit provide a useful supplement to services offered by approved healthcare facilities engaged by mine operators? If yes, please explain why mobile outreach is a useful supplement. If no, or if mobile outreach could be improved, please provide recommendations on how it could become more useful to the coal mining community.

4. Do coal miners receive encouragement to participate (or discouragement from participating) in the CWHSP screenings from others such as employers, unions, or co-workers? If so, please describe.

5. Are scheduling issues, such as the need to take unpaid time off from work or use vacation hours or non-work hours for health screenings, a barrier to miners' participation in health

¹ Blackley DJ, Halldin CN, Laney AS [2018]. *Continued increase in prevalence of coal workers' pneumoconiosis in the United States, 1970-2017*. *AJPH* 108(9):1220-1222.

screenings? If yes, please explain the scheduling issue that is a barrier and provide recommendations for how it could be overcome.

6. Does concern about the confidentiality of medical information pose a barrier to participation? If this is a barrier, then please provide recommendations or suggestions for how it can be overcome.

7. Does concern that the early identification of dust-related lung disease might adversely affect a miner's career (*e.g.*, prevent career advancement or the ability to get a new coal mining job) pose a barrier to participation? If this is a barrier, then please provide recommendations or suggestions for how it can be overcome.

8. Does concern that early identification of dust-related lung disease might affect subsequent eligibility for compensation through Federal or State programs pose a barrier to participation? If this is a barrier, then please describe the specific compensation programs and how eligibility for them can be affected by early detection of dust-related lung disease. Please also provide recommendations or suggestions for how this barrier could be overcome.

9. Does concern that personal finances will require a miner to continue working despite early identification of dust-related lung disease pose a barrier to participation? If this is a barrier, please provide recommendations or suggestions for how it can be overcome.

10. Are there any other barriers to participation that NIOSH should be aware of?

Interested parties may participate in this activity by submitting written views, opinions, recommendations, and data. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you do not wish to be disclosed. Although your name, contact information, or other information that identifies you in the body of your comments will be on public display, NIOSH will review all submissions and may choose to redact or withhold

submissions containing private or proprietary information such as Social Security numbers, medical information, and/or inappropriate language.

Comments may be submitted on any topic related to this action. All public comments will be posted in the docket for this action at <https://www.regulations.gov>.

John J. Howard,

Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention.

BILLING CODE 4163-19-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS-2416-N]

Basic Health Program; Final Administrative Order

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice of Final Administrative Order.

SUMMARY: This notice serves to announce that a Final Administrative Order related to the Basic Health Program (BHP) was issued to the States of New York and Minnesota on August 24, 2018.

DATES: The Final Administrative Order was effective August 24, 2018.

FOR FURTHER INFORMATION CONTACT: Christopher Truffer, (410) 786-1264; Meg Barry, (410) 786-1536.

SUPPLEMENTARY INFORMATION:

I. Background and Provisions of the Notice

The CMS Administrator issued a Final Administrative Order to set forth the revised payment methodology that applies to the Basic Health Program for 2018 *only* (HHS Revised BHP Payment Methodology). The Administrative Order is an agency action under 5 U.S.C. 551(13), issued pursuant to 5 U.S.C. 555(b) and (e).

The HHS Revised BHP Payment Methodology modifies the existing

methodology for 2018, which is set forth in the payment notice entitled "Basic Health Program; Federal Funding Methodology for Program Years 2017 and 2018" (81 FR 10091, February 29, 2016) (February 2016 Payment Notice). The modification involves the application of a Premium Adjustment Factor (PAF) that considers the premium increases in other states that became effective after the Centers for Medicare & Medicaid Services (CMS), an operating division of the U.S. Department of Health and Human Services (HHS), discontinued payments to issuers for cost-sharing reductions (CSRs) provided to enrollees in qualified health plans (QHPs) offered on health insurance Exchanges.

On July 6, 2018, pursuant to an amended stipulated order issued in *State of New York v. U.S. Department of Health and Human Services*, 18-cv-00683 (S.D.N.Y. filed Jan. 26, 2018), CMS issued a Draft Administrative Order on which New York and Minnesota (the States) had an opportunity to comment. The States each submitted comments on August 6, 2018. CMS considered those comments in issuing the Final Administrative Order, which adopts the HHS Revised BHP Payment Methodology for 2018 as set forth in the Draft Administrative Order.

II. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*) is not required.

III. Addendum

We are publishing the Final Administrative Order as an addendum to this Notice.

Dated: November 2, 2018.

Seema Verma,

Administrator, Centers for Medicare & Medicaid Services.
