**Subject:** PUBLIC COMMENT ON INTERIM FINAL RULE ON DOSE RECONSTRUCTION

TO Docket Officer:

My comment on the interim final rule is that I feel people have different tolerances to radiation exposure. Some may be able to tolerate a higher dose, and others may not be able to tolerate that dose. They may develop cancer from whatever the exposure may be. A dose limit may be fine for some but not for others. For example, I feel that if someone develops cancerous tumors or leukemia from radiation exposure they should be compensated regardless of their exposure. I urge you to compensate radiation workers who have developed cancer.

Thank you for your time.

Sincerely,

Marguerite and Marilyn Love
