

# Department of Energy Support to the Energy Employees Occupational Illness Compensation Program Act (EEOICPA)

Office of Environment, Health, Safety and Security

December 2019

# DOE's Core Mandate

Work on behalf of the program claimants to ensure that all available worker and facility records and data are provided to DOL, NIOSH, and the Advisory Board.

# DOE Responsibilities

- Respond via the SERT system to DOL and NIOSH requests for information related to individual claims (employment verification, exposure records).
- Provide support and assistance to DOL, NIOSH, and Advisory Board on large-scale research and site characterization projects through records research and retrieval efforts at various DOE sites.
- Conduct research, in coordination with DOL and NIOSH, on issues related to covered facilities designations.

# Individual Records (cont.)

- Claimants often worked at multiple DOE sites, for multiple contractors and subcontractors, and in different jobs or divisions over a career.
- For a typical request for a worker's records, DOE may have to go to many different site departments and within those departments many different records sources or databases.
- For example, one DOE site routinely checks approximately 40 different sources for responsive records, including hardcopy paper records, microfilm, microfiche, databases, and scanned electronic records.

# Volume of records

- In FY18, responded to 16,432 records from over 25 different DOE locations.

# Response – 60 Day Goal

- In FY 18, DOE responded in under 60 days to 16,432 out of 16,849 records requests from DOL and NIOSH.
- 98% on time response rate.
- Many sites have a near perfect record
  - DOE Legacy Management: 0 late out of 1,309
  - Savannah River: 0 late out of 1,263
  - Nevada National Security Site: 0 late out of 951

# Large-Scale Research Projects

- Large-scale research projects are driven by the needs of DOL and NIOSH.
- DOE accommodates all requests.
- These projects can take years.

# Document Reviews

- DOE committed to providing documents to NIOSH, DOL, and the Advisory Board, but must do so in a responsible manner.
- DOE HQ reviews NIOSH generated reports but DOE field sites review the DOE source documents
  - The average turnaround time for reports reviewed at DOE HQ is typically about 8 work days. (but there are fewer reports and they are typically shorter)
  - The turnaround time for source documents reviewed in the field can vary considerable because there can be hundreds of documents requested and thousands of pages to review.

# Facility Research

Research and maintain the Covered Facilities Database

- Database of **over 300 facilities covered** under EEOICPA. This includes DOE facilities, AWEs and Beryllium Vendors whose employees are eligible for benefits under EEOICP.
- Full listing can be found at:  
<https://ehss.energy.gov/Search/Facility/findfacility.aspx>

# Outreach

- Continued to participate in all Joint Outreach Task Group meetings that include DOE, DOL, and NIOSH, along with the DOL Ombudsman and the DOE Former Worker Medical Screening Programs.
- Recent meeting in Amarillo, TX

# Former Worker Medical Screening Program

- Mission: To identify and notify former workers at risk for occupational disease and offer them medical screening that can lead to treatment.
- Program now serves *all* former workers from *all* DOE sites in locations close to their residences.
- Published an annual report.
