

Department of Energy Support to the Energy Employees Occupational Illness Compensation Program Act (EEOICPA)

Office of Environment, Health, Safety and Security

December 2021

News

- New Director of the DOE Office of Health and Safety (AU-10) – Mr. Kevin Dressman
- Previously he served as the Director of the DOE Office of Enforcement, the DOE organization that implements the Department’s regulatory enforcement program.
- He is unable to participate today but is looking forward to participating in future meetings.

DOE's Core Mandate

Work on behalf of the program claimants to ensure that all available worker and facility records and data are provided to DOL, NIOSH, and the Advisory Board.

DOE Responsibilities

- Respond via the SERT system to DOL and NIOSH requests for information related to individual claims (employment verification, exposure records).
- Provide support and assistance to DOL, NIOSH, and Advisory Board on large-scale research and site characterization projects through records research and retrieval efforts at various DOE sites.
- Conduct research, in coordination with DOL and NIOSH, on issues related to covered facilities designations.

Individual Records

- Claimants often worked at multiple DOE sites, for multiple contractors and subcontractors, and in different jobs or divisions over a career.
- For a typical request for a worker's records, DOE may have to go to many different site departments and within those departments many different records sources or databases.
- For example, one DOE site routinely checks approximately 40 different sources for responsive records, including hardcopy paper records, microfilm, microfiche, databases, and scanned electronic records.

Large-Scale Research Projects

- Large-scale research projects are driven by the needs of DOL and NIOSH.
- Recent data capture requests for the following DOE sites:
 - Y-12 National Security Site
 - Fernald
 - Idaho National Lab

Document Reviews

- DOE committed to providing documents to NIOSH, DOL, and the Advisory Board, but must do so in a responsible manner.
- DOE HQ reviews NIOSH generated reports but DOE field sites review the DOE source documents
 - The average turnaround time for reports reviewed at DOE HQ is typically about 8 workdays. (but there are fewer reports and they are typically shorter)
 - The turnaround time for source documents reviewed in the field can vary considerably because there can be hundreds of documents requested and thousands of pages to review.

Facility Research

Research and maintain the Covered Facilities Database

- Database of **over 300 facilities covered** under EEOICPA. This includes DOE facilities, AWEs and Beryllium Vendors whose employees are eligible for benefits under EEOICP.
- Full listing can be found at:
<https://ehss.energy.gov/Search/Facility/findfacility.aspx>

Former Worker Medical Screening Program

- Mission: To identify and notify former workers at risk for occupational disease and offer them medical screening that can lead to treatment.
- Program now serves *all* former workers from *all* DOE sites in locations close to their residences.
- Published an annual report.
