

Update: Subcommittee for Dose Reconstruction Review

Meeting of the Advisory Board on Radiation and Worker Health

August 7, 2024

David Kotelchuck (Chairperson), Josie Beach, Bradley P. Clawson,
James E. Lockey, Loretta R. Valerio, Arthur Frank

Subcommittee updates

- SC met on June 4, 2024
 - First regular meeting since April 2022
 - Reviewed findings and observations from Set 31
- BRS now available again
 - Plan to resume tracking issues in BRS
 - Backlog of issues resolution to be loaded

Set 31 progress from June meeting

- Type 1 Findings and Observations:
 - Closed: 24
 - In Abeyance: 1
- Type 2 Findings and Observations:
 - Closed: 3
 - In Progress: 7
 - Transferred: 4

Set 32 status

- Delivered September 2023
- One-on-ones completed in February 2024
- Cases revised and reissued March 2024
- Awaiting responses from NIOSH

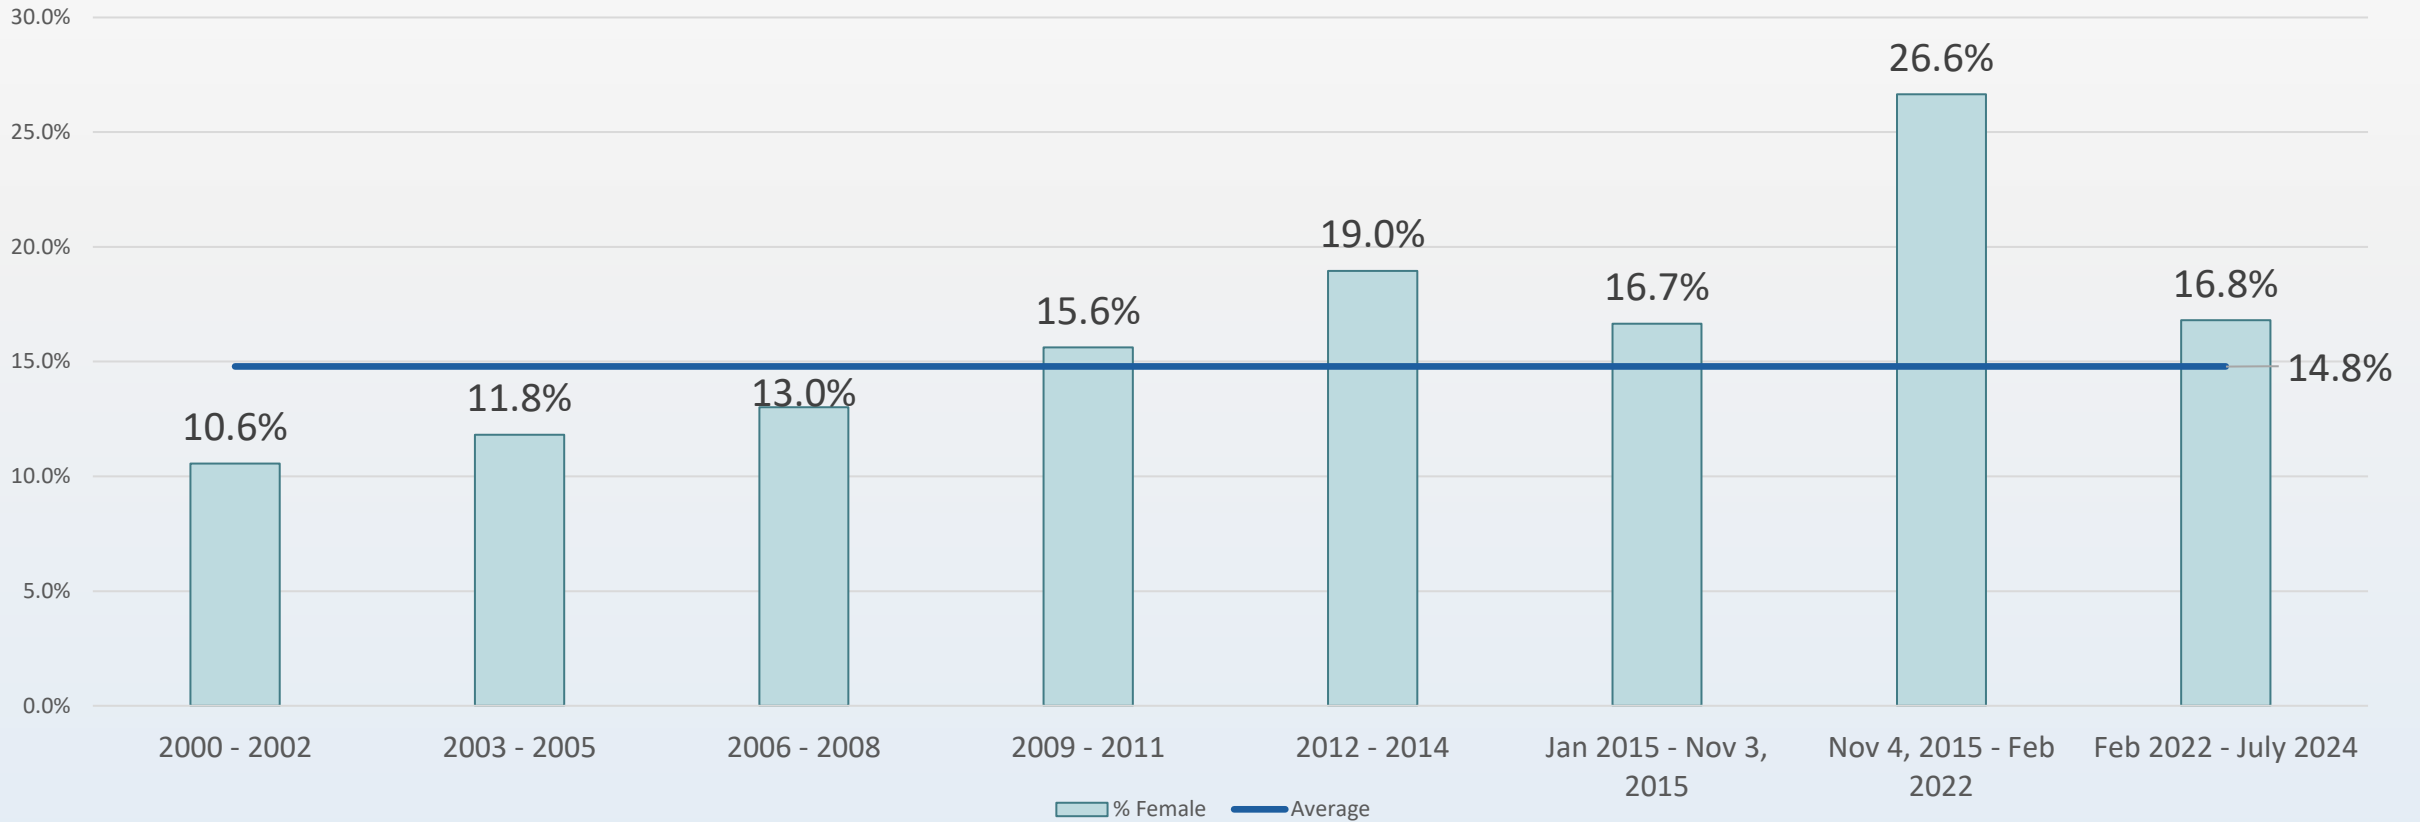

Set 33 status

- Delivered June 28, 2024
- Awaiting one-on-one assignments

Selection of female claim cases for review

- In April 2022, Board approved updated SDRR selection criteria
 - Increased female case selection to at least 8 per set of 30 cases (26.7%)
- For Set 33, Board was provided with only 3 female cases
 - All 3 were selected
 - SC&A identified this was below criteria
 - SC Chairperson and DFO decided to move forward with Set 33
- Discussed at the June SDRR meeting
 - This selection criterion is a target, not a requirement
 - SC decided to compensate for missing this target by selecting more female cases in future sets

Percent female claims by file year

Gender distribution of DR Sets 1–33

Gender	Number reviewed	Percent of total
Male	603	89%
Female	75	11%
Total	678	100%
