Subject: Docket 140 (GSI) submission

Dear NIOSH Docket officer,

Filename: <McKeel_Critique_Allen2GSI.pdf> 4.1 MB

Please accept the attached PDF file as a submission to DOCKET 140 for General Steel Industries.

I ask you to please post this critique of the David Allen DCAS white paper dated January 2012 concerning Betatron Operations with as little delay as possible. There is a March 15 scheduled meeting of the TBD-6000 work group that is considering GSI Appendix BB and SEC-105. My critique is highly relevant to both technical documents. I would also appreciate it if the entire PDF file, with its contained color photographs and drawings, be posted as is. A black and white version would obscure vital information (highlights and colored photographs). I have tried to make the file as small as possible for the web, while still preserving vital image details.

Thank you -- Dan McKeel February 27, 2012

Daniel W. McKeel, Jr., MD

GSI SEC-00105 co-petitioner
